Inventory of Major Alberta Projects

Introduction

The Inventory of Major Alberta Projects is produced by Alberta Treasury Board and Enterprise to assist firms in identifying potential supply opportunities.

The Inventory lists construction projects in Alberta valued at $5.0 million or greater that are planned, underway, or have recently been completed. The report also identifies projects that have been put on hold or deferred. Project data is obtained from public and private information sources. Where possible, this data has been verified with the project proponent/developer. However, users of the Inventory may wish to confirm project data with the proponent/developer.

While efforts have been made to obtain the most recent information, it should be noted that projects are constantly being re-evaluated by industry. Although the Inventory attempts to be as comprehensive as possible, some information may not be available at the time of printing, or not published due to reasons of confidentiality.

The Inventory can be accessed on the Internet at www.albertacanada.com/about-alberta/inventory-of-major-projects.html. New projects and (where possible) updated information on current projects is added to the Internet database on a monthly basis. The print edition of the report is produced quarterly. Projects added to the Inventory between October 1 and December 31, 2011 are shown in the 'New Projects' table on page iii and in upper case in the Project Description column in the body of the report. If you have questions or require additional information about the Inventory, contact Alberta Treasury Board and Enterprise by phone at (780) 427-6787, by fax at (780) 422-0061 or by e-mail at Kathy.Dumaresq@gov.ab.ca .

Highlights of the December 2011 Inventory of Major Alberta Projects Report

In December 2011 the value of the Inventory of Major Alberta Projects was $208.8 billion, up from $182.5 billion in December 2010. The current inventory is comprised of 920 projects. The sector with the largest number of projects is infrastructure with 323, valued at $19.9 billion. The second largest sector is institutional at 128 projects valued at just under $8.6 billion.

The sector with the largest dollar value is oil sands. At the end of December there are 66 oil sands projects (mines, in-situ extraction and upgraders) with an estimated value of $133.6 billion. These are projects that are either under construction or scheduled to begin construction within the next two to three years. A number of oil sands projects have additional phases, but the capital values of these future phases are not included in the current inventory of projects.

As of the end of December the Inventory includes 55 projects with a value of $21.2 billion that are still on hold from the economic downturn in 2008 - 2009. In December 2010 there were 61 deferred projects valued at $26.5 billion. Currently the residential category has the largest number of deferred projects at 19. The oil sands sector has the largest dollar value of deferred projects at $15.3 billion.

One hundred twenty-three new projects were added to the Inventory between October 1 and December 31, 2011. The estimated construction value of these new projects is close to $17.2 billion. Of these, the four largest projects in terms of dollar value are Imperial Oil's Kearl Lake oil sands project phase 2 ($8.9 billion), the proposed Edmonton LRT expansion from downtown to Mill Woods ($1.4 billion), the MacKay OPCO oil sands project phase 1 ($1.3 billion) and Laricina Energy's 'Germain' oil sands phase 2 in-situ project ($1.1 billion).

This gain was augmented by federal approval for Total Canada's Joslyn North oil sands mine valued at $8.9 billion (previously estimated at $6 billion, for a gain of $2.9 billion in the Inventory), and the increase in the estimated construction cost of Southern Pacific Resource Corp. MacKay oil sands project phase 2 from $100 million to $1.14 billion. It was offset by the removal of the proposed Syncrude Project Phase 4 (upgrader expansion and Aurora South Mine trains 1 and 2, valued at $2.3 billion) upon a November announcement by Imperial Oil that that project would not proceed in this decade.

In another good news story, Devon Canada's 'Jackfish 3' oil sands project received approval this quarter, and construction on that project will start early in 2012.

Twenty-nine per cent of the new IMAP projects are infrastructure projects (roads, bridges, water/sewer, government office buildings, RCMP/police/fire stations, LRT lines and transit centres) valued at $2.0 billion, while another 23% are institutional projects (schools, hospitals, post-secondary education, seniors lodges/continuing care/supportive housing projects) with an estimated construction value of $604 million.

Eighteen per cent are residential projects (apartment buildings, townhouse complexes, affordable housing) valued at $330 million.

Eight new projects were added to the Oil Sands sector this quarter, with a total value of $12.9 billion.

The remaining 24 per cent of new projects (valued at $1.3 billion) are shared among the agriculture, biofuels, commercial/retail, commercial/retail and residential, forestry, oil/gas, other industrial, pipelines and tourism/recreation sectors.

1. This Inventory lists projects in Alberta, valued at $5 million or greater, that have recently been completed, are currently under construction, or are proposed to start construction within two years. Not all projects over this threshold are listed due to reasons of confidentiality and/or due to information not being available at the time of printing.
2. Project data is obtained from public information sources. Although, where possible, this data has been verified with the project proponent/developer, users of the Inventory may wish to *confirm* project data with the proponent/developer.
3. The Inventory does not breakdown project expenditures by any given year. The cost of a project is the value of expenditures expected over *all* phases of project construction, which may span over two or more years.
4. The cost of projects listed in the Inventory are *estimated* values only.
